

Finally I have a commercial free radio option that I can listen to everywhere!!! and I find out that the NAB wants to limit it in scope. Please don't let this happen!!! The weather and road reports are up to date concise and with the weather you get a visual as well verbal update. I have been marveling of XM radio and find now that the people who provide 2 min of info and 5 min. of commercials want to ban it. PLEASE DON'T LET THIS HAPPEN!!! THANK YOU
